

# Nationwide Bank Account

## Volatility Meter\*

Investment volatility, when shown, is a function of the fund's Morningstar 3-year Risk Rating. On an annual basis, Empower assigns a ranking for the Investment volatility based on the fund's standard deviation. Asset Category volatility is based on the average standard deviation of funds in this asset category. Risk Rating, standard and average deviation provided by Morningstar.

Low	Moderate	High
-----	----------	------

▲ Asset Category  
**\*For illustrative purposes only.**  
The Asset Category volatility measure will always be displayed. If the Investment volatility measure is not displayed, the investment may have fewer than three years of history or the data may not be available.

## Asset Category

Fixed Interest

## Investment Objective & Strategy

The Nationwide Bank Account is a fund option alternative for plan participants with a lower risk tolerance and/or those looking for liquidity. Offered through Nationwide Bank, an affiliate of Nationwide Insurance(R), this account provides savings account-like returns with the full FDIC protection of up to \$250,000 per participant.

## Risk Profile

The investment may be most appropriate for someone wanting to safeguard principal value or to balance a portfolio which contains more aggressive investments. The investor may be requiring stability and asset liquidity.

# Glossary & Investment Option Disclosures

<b>3-Year Risk Rating</b>	An annualized measure of a fund's downside volatility over a three-year period. Morningstar Risk Rating is derived directly from Morningstar Risk, which is an assessment of the variations in a fund's monthly returns, with an emphasis on downside variations, in comparison to similar funds. In each Morningstar Category, the top 10% of investments earn a High rating, the next 22.5% Above Average, the middle 35% Average, the next 22.5% Below Average, and the bottom 10% Low. Investments with less than three years of performance history are not rated.
<b>Fixed</b>	Stability of principal is the primary objective of this investment option. The fixed account guarantees a minimum rate of interest for the life of an annuity contract, but may credit a higher interest rate from time to time. Interest is credited to the principal and the investment increases through compound interest to create a book value amount to the participant. Amounts allocated to the fixed account are held in funds offered through an insurance company's general account or separate account. Please consult your plan sponsor on specific provisions of your stable value fund.
