

Lockheed Martin Corporation Salaried Savings Plan - 150563-01

Investment Performance as of 04/30/2026

Performance data quoted represents past performance and is not a guarantee or prediction of future results. Investment returns and principal value of an investment will fluctuate so that, when redeemed, shares/units may be worth more or less than their original cost. Funds are subject to certain market risks. Current performance may be lower or higher than performance data shown.

Performance for a share class before its inception is derived from the historical performance of the oldest share class. If the newer fund has lower expenses, the extended performance is not adjusted for the lower expenses; had it, returns would have been higher. For performance data current to the most recent month-end, please visit [LockheedMartinSavings.com](https://www.lockheedmartinsavings.com).

Carefully consider the investment option's objectives, risks, fees and expenses. Contact us for a prospectus, summary prospectus for SEC registered products or disclosure document, including fund fact sheets, for unregistered products, if available, containing this information. Read each carefully before investing.

On occasion, the name and/or objective of an investment may change. Investment decisions should not be based solely on the performance data contained herein. Although data is gathered from reliable sources, the completeness or accuracy of the data cannot be guaranteed.

For prospectuses related to investments in your Self-Directed Brokerage Account (SDBA), contact Charles Schwab at www.schwab.com or 1-888-393-7272.

Expense ratios shown on participant and plan level statements are gross expense ratios and do not include any applicable fee waivers or expense reimbursements, as do net expense ratios. The expense ratios may be based on a prior reporting period than those shown on the Plan's investment performance report. For the most current expense ratios please visit LockheedMartinSavings.com.

The expense ratios are estimated based on the range of Total Annual Expenses as disclosed in Appendix C of the Investment Options Guide. Refer to the Guide for actual expense ranges.

¹ Foreign securities involve risks, such as currency fluctuations, economic changes and political developments. These risks may be heightened in emerging markets, which may also experience liquidity risk.

² Bond prices generally fall when interest rates rise (and vice versa) and are subject to risks including changes in credit quality, market valuations, inflation, liquidity, and default. High-yield bonds have a greater risk of default.

³ Note: The composition of the glidepath for the LMIMCo Target-Date Funds was changed on April 12, 2021. For more information on the changes, please review the fund fact sheets located in the Investment Options Guide.
